

# Learn the secret OF CONFIDENT IT DEPARTMENTS

Not paying attention to business is risky business. Companies focus on reducing costs when jumping to the next release or working through the next acquisition. But what about the additional *risk* or loss of *control*?

Since 1985 our local teams have specialized in helping over 400 companies balance risk, cost and control in a way that makes sense for them. We are the secret weapon of efficient IT departments.

As one of 12 global Oracle Certified Advantage Partners in the world, with 1,000+ Peoplesoft and JD Edwards worldwide, we understand the ERP promise of integrating all aspects of your business. We also understand the practicalities of what that means.

IT departments gain confidence by utilizing our teams to ask the tough questions: Does your project plan tell you where you are going? Is the requirement spelled out? Is the business process documented and is it current? Have you planned for the worst case scenario? What if your assumptions are wrong? There is risk in any project—where is yours?

## THE BEST AT WHAT WE DO

We are *the* premiere group of ERP consultants, solving our clients' challenges while supporting their enterprise application needs. It's a claim we don't make lightly.

- With over 20 years of experience we've seen it all. Not much surprises us.
- As one of a handful of global Oracle Certified Advantage Partners in the *world*, we know how ERP systems work inside and out.
- Our consultants have an average of 18 years experience in the industry and 8 years with Infocrossing.
- We practice disaster avoidance, not just project management.

That experience and expertise translates into consultants who hit the ground running on Day One. You achieve maximum value while preparing for the unavoidable and unexpected. Don't hire a consultant to be a buddy; hire one who will tell you the truth. A bad consultant can put your business out of business fast.

## NO MORE SLEEPLESS NIGHTS

We know you have a lot to think about:

- Getting the best value from your ERP system
- Assuring your foundation stays stable
- Keeping systems online
- Upgrading to accommodate growth or changing business requirements
- Integrating the next acquisition
- Hiring and retaining the best talent you can afford

Here's what we're thinking about:

- How can this client use their ERP system as a competitive advantage?
- Are there best practices from other industries that apply here?
- I've seen this before. We have to watch out for ...
- What will customizing the system do to the planned upgrade next year?
- How is the client going to use our work after the assignment is complete?
- Is there an easier way for the client to get their jobs done?
- What happens if all the assumptions are wrong?

You'll never have another sleepless night knowing Infocrossing's got you covered. We can help with implementations and upgrades or provide managed application services. We can help you create and manage your own Master ERP Plan. Consultants work seamlessly onsite or remotely as part of your team. You may not need all 75,000 of our employees worldwide, but they're here to help if you need them.

## DISCOVER AN EASIER WAY TO DO BUSINESS

Contact one of our account managers today for a no-obligation evaluation on a whole new way of managing risk, cost and control. Learn how Infocrossing will propel your business forward without taking a wrong turn.

### WHY INFOCROSSING?

Infocrossing has helped companies worldwide for over 20 years to improve their profitability, maximize their capital investments, and manage internal growth. As the premiere group of ERP consultants, our depth of systems knowledge coupled with our global resources make us the perfect choice for companies looking for a better way to do business.

## ABOUT INFOCROSSING [WWW.INFOCROSSING.COM](http://WWW.INFOCROSSING.COM)

Infocrossing, a Wipro company, is a provider of IT outsourcing and business processing solutions, delivering the computing platforms and proprietary systems that enable companies—regardless of industry—to process data and share information within their business and between their customers, suppliers and distribution channels. Leading companies reduce costs and improve system delivery by leveraging Infocrossing for server (mainframes, midrange, open system) and network management; healthcare IT and BPO; managed messaging support; and enterprise application services. Founded in 1984, Infocrossing and its subsidiaries became indirect, wholly owned subsidiaries of Wipro Limited in 2007.
