Meet the PhDs of ERP

You understand the nuances of Higher Education—but do the consultants helping you with your ERP system?

Is your current vendor really in touch with the unique needs of campus community? Sure, they might know the HR and financial systems that large commercial enterprises need, but what about campus-specific solutions for:

- Delivering 24/7 access to information and services in a secure learning environment

- Improving transparency, compliance, and efficiencies by effectively managing funding and student accounts

- Meeting the demands of your tech-savvy students and faculty for intuitive self-service management

ERP isn't just about payroll and benefits. It's about flexibility to meet the specialized needs of every organization, especially yours. And it's about balancing the three critical factors of every project—risk, cost and control—to ensure that your ERP system delivers the performance necessary to see your organization succeed in this highly competitive education environment.

We are one of 12 global Oracle Certified Advantage Partners, with 1,000+ consultants worldwide. This means we deliver unparalleled expertise servicing colleges and universities large and small. We offer the flexibility that these institutions demand.

GET EDUCATED ABOUT THE ADVANTAGES OF FLEXIBILITY

What are the benefits of flexibility to your organization?

- The ability to roll out HR, financial and campus-specific platforms *any way you want,* including a phased-in or "big bang" approach, or maybe adapting to the implementation plan of a satellite campus

- The ability to choose the assistance that works best for your organization:
  - Use our experienced project managers directly onsite
  - Use them as back-up
  - Use our global outsourcing capabilities to keep costs in check

- The ability to use our 5 world-class data centers to protect the critical information of your institution

WE MAJOR ON THE RIGHT SOLUTIONS FOR YOUR FACULTY, STAFF AND ALUMNI

And we know what you're looking for to support them, including:

- More intuitive self-service functionality and more choices for managing your institutional processes—without costly customization.

- Better student and advisor collaboration to facilitate academic achievement and a lower total cost of ownership (TCO) over time.

We help you gain this robust functionality with seamless stability by:

- Providing 10 years of ERP expertise including HRMS, campus solutions and financials.

- Delivering over 20 years of experience overall, including status as one of 12 global Oracle Certified Advantage Partners in the *world*.

- Offering planning, functional and technical analysis, as well as design and development for any ERP-related implementation.

- Helping you create a Master ERP Plan to implement new technologies in the most effective and efficient method possible.

- Building an ERP model that includes disaster avoidance, not just project management, to protect smooth operations and data privacy.

Our consultants have an average of 18 years experience in the industry. And we deliver the ability to provide full-service consulting or remote support as needed. This means you can get as much—or as little—support as you need. Whatever your educational institution needs, we have the flexibility to make it happen.

LEARN HOW FLEXIBLE YOUR PROJECT CAN BE

Contact one of our account managers today for a no-obligation evaluation on a whole new way of managing risk, cost and control. Experience for yourself why Infocrossing is at the top of the class when it comes to ERP solutions for higher education.

WHY INFOCROSSING?

Infocrossing has helped companies worldwide for over 20 years to improve their profitability, maximize their capital investments, and manage internal growth. As the premiere group of ERP consultants, our depth of systems knowledge coupled with our global resources make us the perfect choice for companies looking for a better way to do business.

ABOUT INFOCROSSING WWW.INFOCROSSING.COM

Infocrossing, a Wipro company, is a provider of IT outsourcing and business processing solutions, delivering the computing platforms and proprietary systems that enable companies—regardless of industry—to process data and share information within their business and between their customers, suppliers and distribution channels. Leading companies reduce costs and improve system delivery by leveraging Infocrossing for server (mainframes, midrange, open system) and network management; healthcare IT and BPO; managed messaging support; and enterprise application services. Founded in 1984, Infocrossing and its subsidiaries became indirect, wholly owned subsidiaries of Wipro Limited in 2007.
